The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Oshlack (US 4,861,598).

Oshlack teaches a controlled release base for pharmaceuticals comprising an acrylic resin (abstract). Polyvinyl pyrrolidone is specified as an excipient (column 3 lines 52-58). An acrylic resin with an excipient and the active is disclosed (column 3 lines 59-67). Tablets is specified (column 4 lines 8-10). Oxycodone is disclosed as an active (claim 10). Delayed release over 12 hours and up to 24 hours is specified (column 4 lines 45-52). An amount of active agent as low as 9.3 mg (column 6 line 9) and as high as 225 mg (column 5 line 11) is disclosed.

Claims 11-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. On pages 20 and 21 applicants disclose the claimed amounts of active with particular amounts of povidone and acrylic polymer. No ranges or ratios of the three ingredients are specified elsewhere in the specification. Thus, it appears that the inventions of claims 11 and 12 must be limited to the amounts of povidone and acrylic polymer disclosed on pages 20 and 21 respectively.

No claims allowed.
